About

We produce and exports standard and individual design wooden houses for customers in 20 countries. 15 years of active operation gives us confidence and experience to offer high quality products and services to our customers.

All our houses are made of kiln dried pine and spruce. Production process involves several stages of wood processing and preparation for final inspection and packing. Houses we produce are completely finished in factory and requires no extra processing.

We take responsibility for protecting human life and the environment across our operations. Our company works according to highest quality and safety standards and is committed to responsible and sustainable corporate governance.

Our main business standards are:

- Business with Integrity
- High quality and Safe product
- Corporate Diligence
- Health and Occupational Safety
- Human Rights and Social Standards
- Environmental Protection
- Data Protection and Intellectual Property

In our production we use modern technologies and mechanisms to make sure that materials, resources and human labour are handled in the best possible way. We invest our time and resources to achieve higher efficiency and avoid errors in production.

Joy of spending time outside

Spending time in green space or bringing nature into your everyday life can benefit both your mental and physical wellbeing. For example, doing things like growing food or flowers, exercising outdoors have lots of positive effects - improve your mood, make you feel more relaxed. Some feel better just by going outside to the garden, and some of us need to go away to the countryside to change our everyday surroundings. There's something about the quiet calm of nature that is contagious, leaving a quiet calm in our mind.

Cabin in your garden or summerhouse in countryside is a great option for many of us. It becomes a place we cherish, look after and embellish. It also become extension of our home where we can cultivate our hobbies, exercise or free our creative energy.

We join you on dreams of making your relaxing space more pleasant, more lively, more comfortable and stylish. We offer a possibility to make your dreams come true, to build wooden structures which will make your garden peaceful getaway to hide from modern life rush.

Wooden garden houses and summer houses offer enjoyable advantages in terms of comfort, climate as well as health or environment. Flexible, resistant, light and durable, wood is suitable for most of the grounds and constructions. Wood prevents dust circulation and static electricity, so wooden interior is easy to maintain. The humidity level is naturally low. A wooden house will make benefit from a healthy, comfortable and balanced interior.

We are always happy to see customers appreciating wooden structures and valuing it's benefits.

From small cabins for those who just want to bring order to their garden, to garden houses for you as relaxing, working, meditating and crafting space, or big summer houses and villas, where you can spend weekends and holidays with family and friends.

Let fantasy carry you away to a perfect leisure space and invite Sodnamis© to join you for making it a reality.

What will you find in our catalogue

Dear customer, all our team is working constantly on developing new models and constructional ideas for houses of all sizes and purposes. We strive to meet newest trends in garden and houses design, also follow the movements of public feeling of sustainability, ecology, minimalism and healthy life style. That is why we offer big range of standard models to meet customers' needs at the best possible price.

In this catalogue you will find wide range of garden sheds/storage cabins of different designs, which are created for modern or classical style garden. Sheds are grouped according to roof type (which usually defines shed's style). We offer these types of roofs: gable roof, shed roof, flat roof and hip roof. Shed/storage cabin internal area can vary from 2 to 14m² to meet owners needs of different size gardens or yards. Some sheds are offered with 2 separate rooms, with possibility to use it for different purposes.

Next category is our standard garden houses/log cabins. A large range of log cabin in several wall thickness and designs add extra living space to home with a versatile garden room. These cabins can serve different purposes from storage to pool houses. In the catalogue garden houses are grouped according to roof type: gable roof, shed roof and flat roof. Sizes varies between 12 and 40 square meters of internal area.

A newest addition to our standard range is home offices/studios. Working from home is the new normal these days. Nearly everyone has made unique adjustments to their personal and professional lives. A separate office is a great addition to your home if you're required to work remotely and want the benefit of physically and mentally "leaving" work at the end of the day. Or maybe you want a separate home office to work on projects or hobbies during off-hours and would benefit from the additional space.

A dedicated work space in your home helps you set aside household distractions and focus on work. Our team offers a range of modern and classic looking home offices of various sizes, which can fit different outside spaces. Our team designed these houses to be spacious and cozy to offer customers more natural light and productive environment.

Next categories in our standard range are summer houses and villas. Wooden houses are an increasingly popular and much-loved alternative for a healthier, ecologically-balanced, and organic living. Prefabricated wooden villas are great solution for country house or even living house, as they can be of different sizes and layouts. These houses can be easily insulated and adjusted for colder seasons. Our team offer a wide range of summer houses and villas, which are categorized by size and layouts. To make search in catalogue easier we divided house sizes to these groups: 20-40 m², 40-60 m², 60+ m² and more, also 1 story and 2 stories houses.

We offer a range of wooden garages and carports, which are one of the fastest and easiest way to build. Garages can be supple in full set with wooden or metal garage gates. Carports have different options of parking space and some of the models have separate storage room for even more practical use.

In the catalogue you will also find a range of gazebo and pergolas. Our range of wooden gazebos and pergolas features many styles and designs. We offer different roof styles so that customers could easily adapt the gazebo/pergola to the design of existing structures.

Also, in our catalogue you will find section with our new concept models. By linking up creative minds and ideas with constructors we seek to find more solutions and options of using wood. The wood is now highly fashionable building material. It is ecological, natural, durable and has survived the test of time. By introducing new and innovative technologies, we always look for sustainable alternatives to provide with new concepts. Housing market of the future requires flexibility and an eye for detail. We are proud to have a team who is always interested in moving forward and offering new solutions.

Ideasplanner.com ©

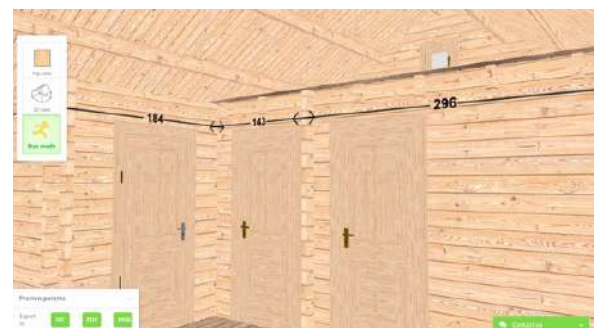

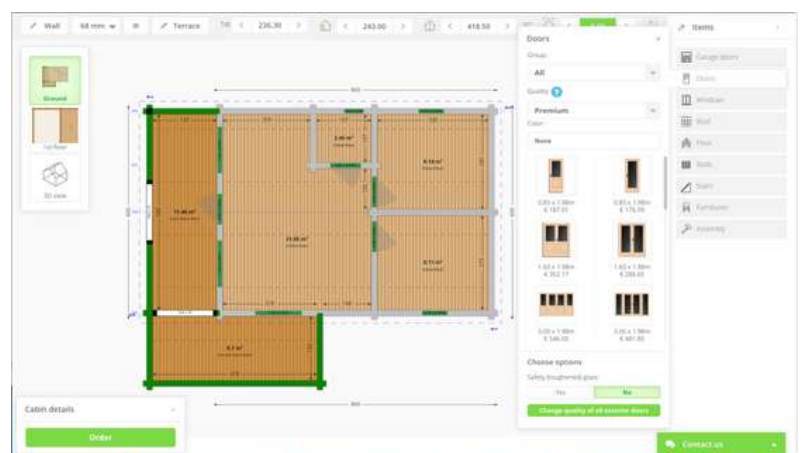

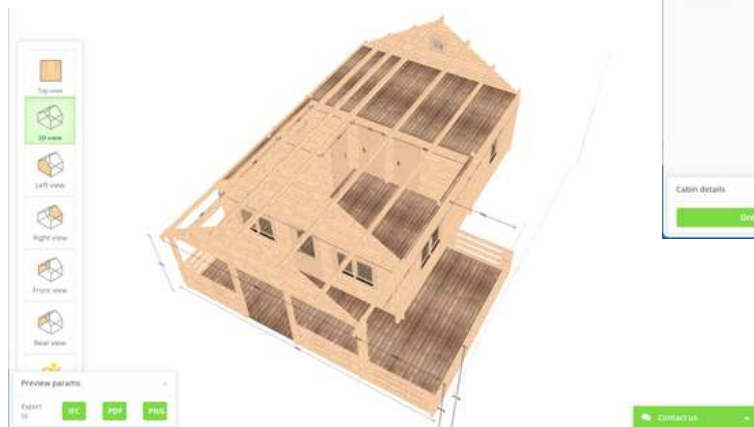

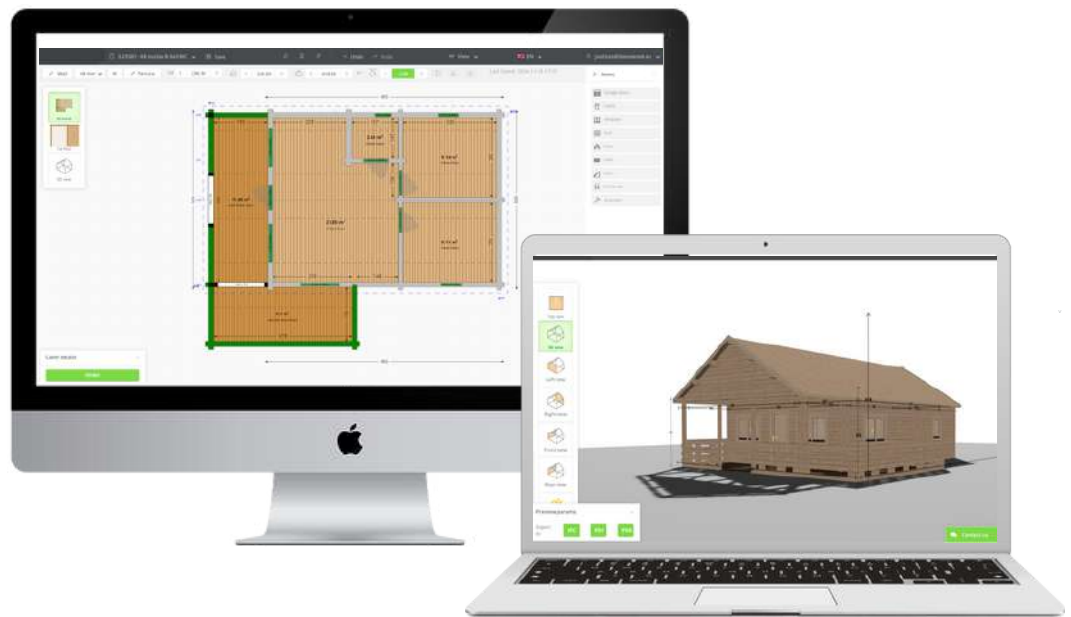

Do you have a unique design and are you looking for a partner to bring this design to life? The Bespoke House is a one-of-a-kind dwelling that meets the individual needs and tastes of the client and the particular demands of the site.

We developed a first in the market on line tool for designing the house with instant price calculation. Ideasplanner© is a No 1 online configurator of bespoke log cabins, summer houses, villas or sheds. A bespoke home is designed specifically to your unique needs, dreams, and specifications. Ideasplanner© provides its user possibility of choosing different types of wood thickness, roof style, windows and doors and many other technical features which makes our configurator very convenient and versatile. Our configurator has user friendly interface and is made for intuitive use. We constantly work on developing our configurator to offer even more options and possibilities. Using Ideasplanner© clients are welcome to personalize their wooden house and we make this experience easy, creative and pleasant.

Optional products

Dipping (pine)

We offer full house dipping in bath of „pine“ colour water-soluble treatment liquide for better protection and durability.

Acrylate-based scrubble concentrate for the industrial coating of wood for outdoor areas, such as garden timber, formwork walings, scaffolding boards.

Properties:

- Highly concentrated;
- Easily soluble in water;
- Fast drying;
- Smooth flow;
- Low grain direction;
- Moisture-regulating;
- Block-resistant;
- Mild odour, odourless after drying.

Bitumen roof tiles

For our convenience we offer bitumen roof tiles with mineral reinforcement, type 6S4X21, produced in accordance with ETA-12/0264 of 30/06/2017. This product intended to be laid as discontinuous covering for pitched roofs and/or wall cladding where the watertightness of the system is ensured by overlapping, according to the manufacturer's installation instructions.

Bitumes tiles are hexagonal shape in several colours (red, green, black, grey, brown).

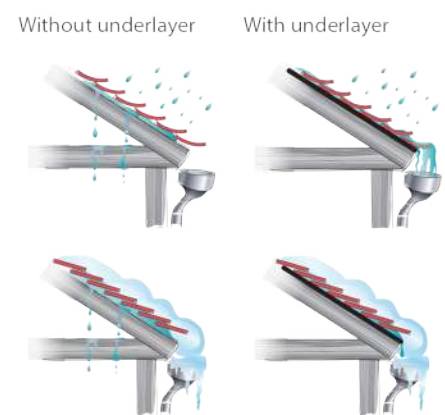

Underlayer

An additional layer of waterproofing used under bitumen tiles that reliably protects the roof from water leakage and extends the service life of the roof covering. We offer high-quality polymer bitumen that ensures complete tightness at the nail penetration points.

Advantages:

- Lightweight material is easy to install on the slope.
- Non-slip surface ensures safety works on the roof and UV protection.
- High quality bitumen-polymer compound has the property of "self-healing", which gives absolute tightness in places of nail penetration.
- Due to the high heat resistance and flexibility UNDERLAY PRO 500 retains the original properties even when exposed to extreme temperatures.
- Underlayer can be used as a temporary roofing.
- Versatility - material is used on any type of roofing.

EPDM roof cover

For flat roofs or roofs that are under 7 degrees roof angle we offer rubber roof covering material – EPDM. This cover has long service life, reduces heating costs and potential condensational problems. Perfect solution for flat modern style roofs.

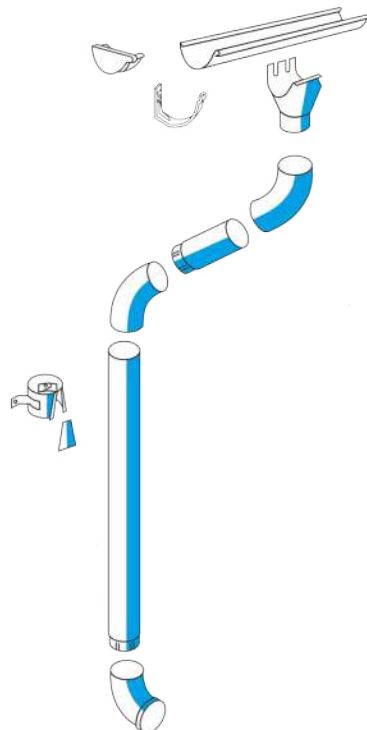

Metal roof cover

According to a project made steel roof tile kit is durable option for two or one slope roofs. Can be supplied different colours.

Raingutters

Raingutter system can be installed on any pitched and one slope roofs, not just steel. The system can be of different colors and can be adapted to various solutions.

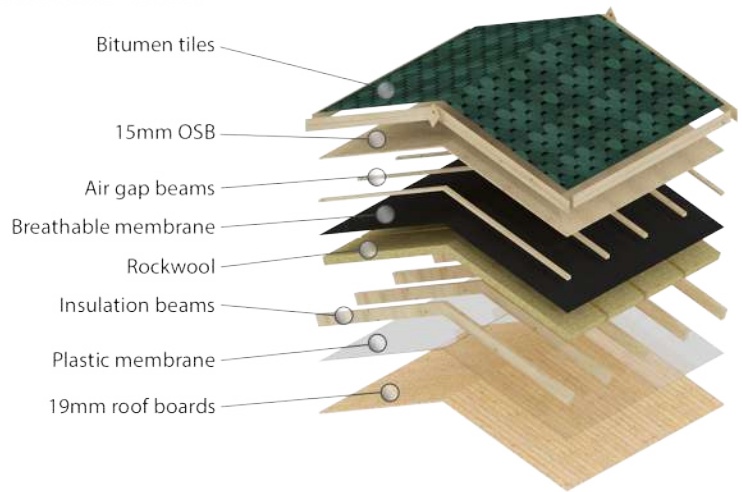

Optional products

136-141

Roof insulation

Roof insulation kit prepared for specific roof is recommended option to make house warmer or to protect house from the heat which appears from direct sunlight.

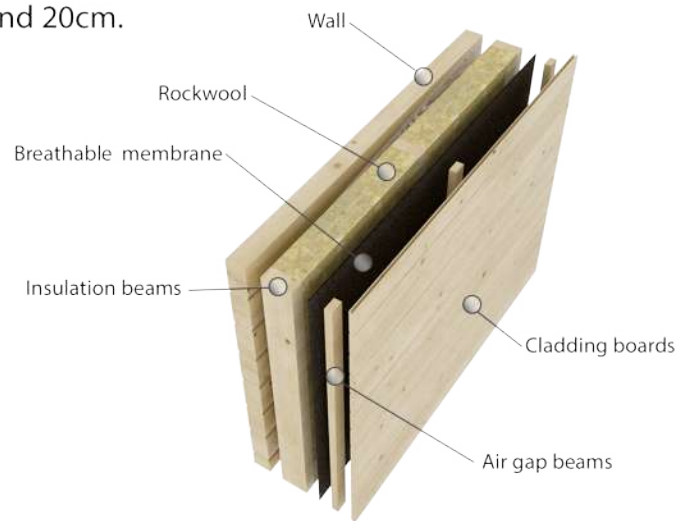

We offer 2 standard roof insulation options: 10cm and 20cm.

Wall insulation

Outside wall insulation kit prepared for specific house to lower heat losses. Supplied with outside decorative boards.

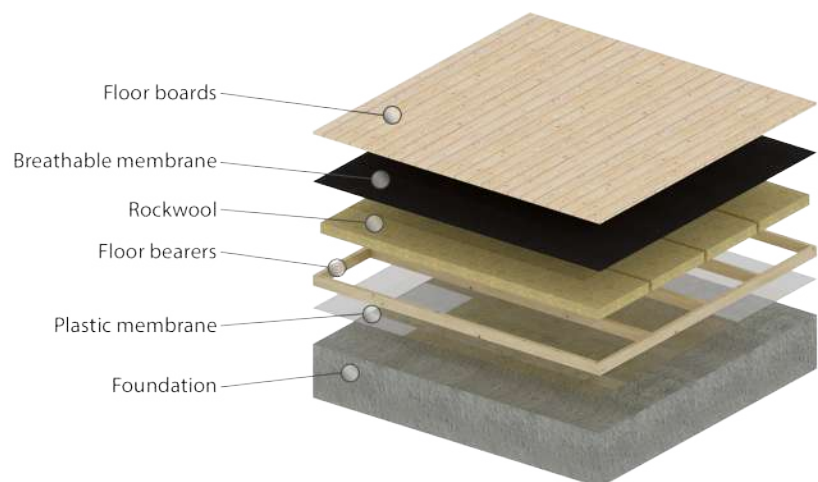

We offer 2 standard roof insulation options: 10cm and 20cm.

Floor insulation

Floor insulation kit prepared for specific house to offer solution to make floor warmer and protect from cold coming from ground.

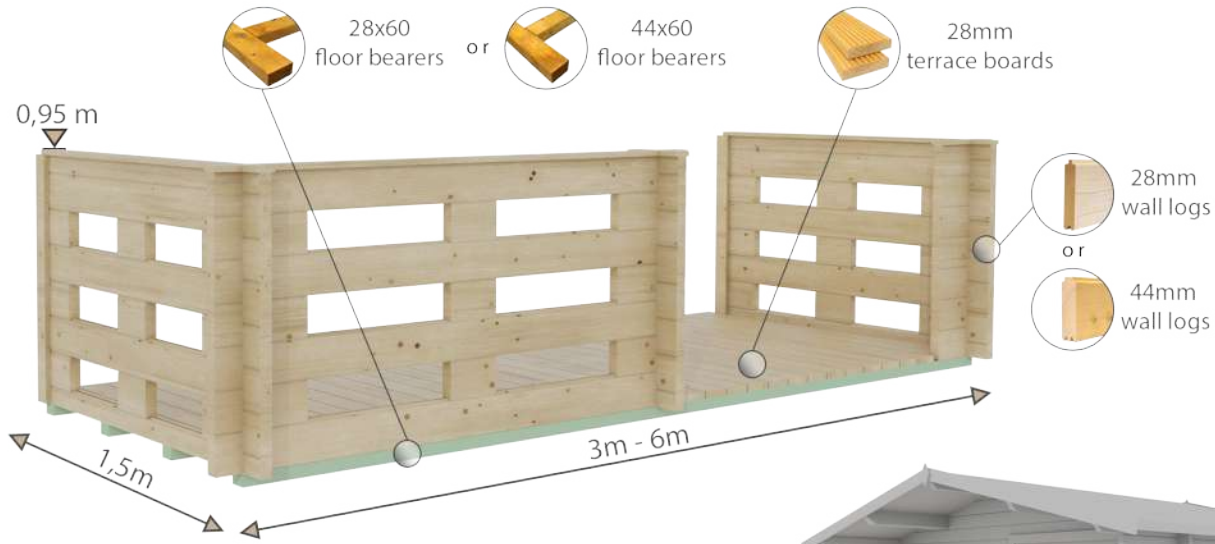

We offer 3 standard roof insulation options: 5cm, 10cm and 15cm.

Terrace

1,5m meter depth wooden terrace with impregnated terrace boards and decorative fence can be added to some standard projects to provide some relaxation area.

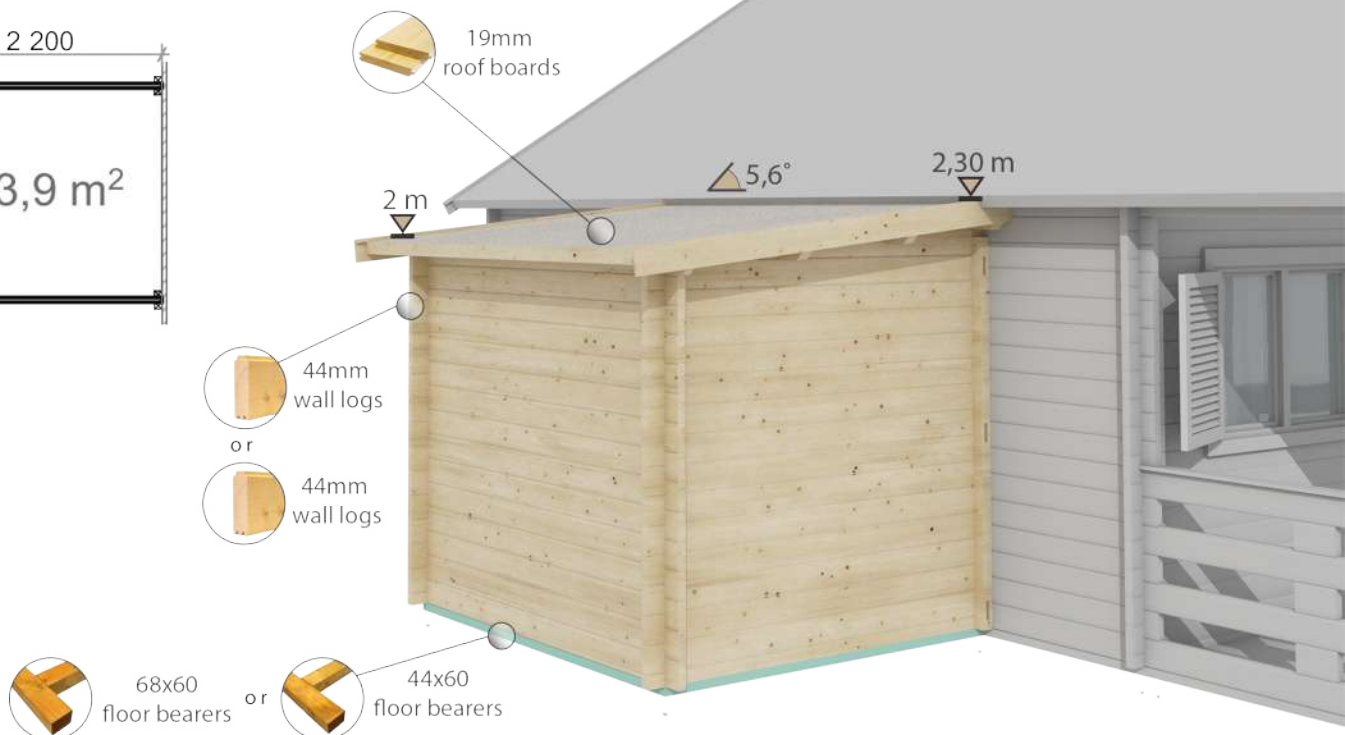

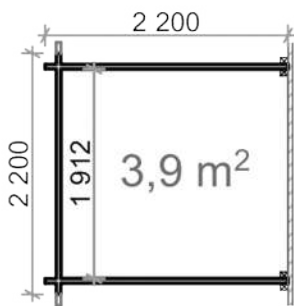

There are different options of width: 3m, 4m, 5m and 6m. Wall thicknesses can be chosen in 44mm (including 44x60 floor bearers) or 28mm (including 28x60 floor bearers).

Extra WC 2,2x2,2

2,2x2,2 extension can be added to some standard projects with possibility increase total living area for making WC room. Extra WC extension have additional 1 window (Premium) 0,52x0,5 m and 1 single full wood door (Premium) 1,98x0,85 m with possibility install items in any place.

Extra WC 2,2x2,2 can be 2 options: 44mm (with optional 19mm floor boards) and 68mm (with optional 28mm floor).

External outward opening composite doors and outward and inward opening windows (Premium plus quality) according to the requirements of BM TRADA A-MARK scheme of Factory Production Control (FPC) detailed in BM TRADA Scheme Technical Document "Verification of FPC according to technical specification" and of EN143251-1:2006+A2:2016

DECLARATIONS OF PERFORMANCE

Identification number: 01_13_0101

Product description:
External opening doors and parts of windows and inward and outward opening windows (Premium plus quality) according to the requirements of BM TRADA A-MARK scheme of Factory Production Control (FPC) detailed in BM TRADA Scheme Technical Document "Verification of FPC according to technical specification" and of EN143251-1:2006+A2:2016

Manufacturer: UAB "Jantus" (Lithuania)

System of assessment and verification of conformity of performance (AVCP system): 1

Notified Authority: 01_13_0101, UAB "Tinkama Technologija" (Lithuania)

Declared Performance:

Essential Characteristics	Performance	Minimum Technical Specifications
Resistance to axial load	Class 3	EN 12227
Resistance to wind load	Class 3	EN 12227
Resistance to impact	Class 3	EN 12227
Resistance to fire	Class 3	EN 12227
Acoustic performance	Class 3	EN 12227
Thermal performance	Class 3	EN 12227
Water performance	Class 3	EN 12227
Structural strength	Class 3	EN 12227
Normal performance	Class 3	EN 12227
Fire performance	Class 3	EN 12227

The performance of the product described in points 1 and 2 is in conformity with the declared performance in point 3. The minimum of performance is equal with the minimum of the corresponding technical specification in point 4.
